

LOCKS

Model ROK Door shield

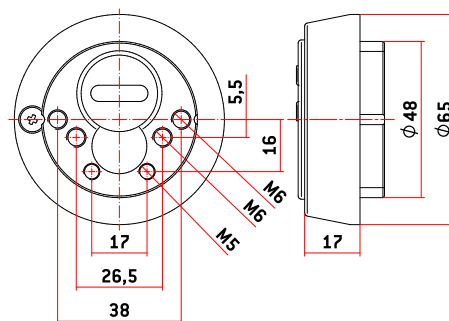

- Type A rotor for EP40 (KABA) and EP50 (KESO) models. Type B rotor for CSI model.
- Solid steel block to hinder drilling.
- Front spiral milling with ROK technology to resist hole-saw attacks.
- Key entry with a rotating, hardened rotor for enhanced protection of the security cylinder.
- Diamond-tipped carbide spine for protection of the cylinder base.
- Solid steel balls embedded in the protective escutcheon trim to prevent hole-saw attacks and gripping with crushing torsion tools.
- Solid steel block to hinder drilling.

Brass-plated ROK

Chrome-plated ROK

Type A
Rotor
(EP40 - EP50)

Type B
Rotor
(CSI)
