

PADLOCKS FOR TRANSPORT

Model NOVA +

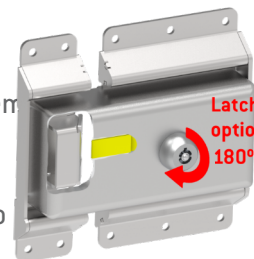

- Plates, outer casing, and latch made of stainless steel (AISI 304)
- Cylinder and keys made of stainless steel (AISI 303)
- High-security cylinder with integrated anti-picking system
- Anti-cut, Anti-bumping, Anti-drill
- Exceptional resistance to prying
- Easy installation
- Available with keyed-alike systems, master keying, and protected keys
- Optional: Slip Latch Locking System
- Optional: Slip Latch Retention System
- NOVA+: Exterior opening by key and interior opening via cable

Latch lock
option
180°

Slip Latch Locking Option: this system allows the latch to remain locked when the key is removed after a 180° turn to the left.

Slip Latch Retention Option: this system keeps the latch in the open position when the key is removed after a 180° turn to the right, allowing the padlock to remain open.

Latch retention
option
180°

* Recommended for transport vehicles.
